# Navigating & Printing TAP Reports on Various Devices

TAP reports can be viewed on any Internet-connected device through an Internet browser such as *Chrome*, *Firefox, Internet Explorer* or *Safari*. For a better experience, we recommend viewing the reports on a computer or larger tablet, rather than on a smaller screened smartphone.

There are, however, some subtle differences in viewing and navigating reports on a computer browser, Android devices and iOS devices (iPad/iPhone). The differences are illustrated in the below image:

Click "Show All" to display all report sections and "Hide All" to return to the Table of Contents view. iOS (iPad, iPhone) may have the best experience using this feature to view reports rather than opening individual sections.

To Print: (1) click "Show All" to expand all sections of the report; (2) Press Print and follow your browsers print instructions
Note: the printing may appear better if you have your browser's print options set to print background colors and images.

This report is for staff only   🖶 Print
